Bio: Chris Holmes is the founder and CEO of Decipher Technology Studios, the creators of the Grey Matter Mesh Networking Platform.  Chris has a strong background in business growth, management, product strategy, enterprise information sharing, large-scale ERP data management, and collaborative technologies. He is an accomplished information technology professional and leader demonstrating career success developing and executing operational strategies to promote organizational growth and optimal utilization of emerging technologies. In starting and developing the Grey Matter platform, he leads the world's most cutting-edge comprehensive multi-cloud and hybrid mesh networking platform on the market. Grey Matter enables flexible service-to-service intercommunications across your hybrid and multi-cloud networks and platforms. The platform has a rapidly growing user base with an eye toward security-conscious globally distributed enterprise-scale organizations.
