

BIO: STEVEN TESSLER

Steven Tessler has supported the cyber security needs of critical infrastructure for over 16 years. Steven was Director of IT for a local government supporting the government operations including public works and emergency services (police, fire, ems, etc). During this time he also worked on federally funded integration initiatives between law enforcement and tier 1 critical infrastructure. Over the last 7 years, Steven has been working at Raytheon and Forcepoint focusing on Network Segmentation, Cross Domain, and Insider Threat solutions in the Government and Critical Infrastructure space.

Steven Tessler
Principal Solutions Architect / Sales Engineer Global Government and Critical Infrastructure
