

**Christina Hoefler**  
**Global Principal Systems Engineer for OT/ICS Solutions**  
**Forescout Technologies**

Christina is the Global Principal Systems Engineer for OT/ICS Solutions at Forescout Technologies. As Subject Matter Expert on Industrial Cyber Security she advises global key accounts, such as utilities, chemical and manufacturing organizations, on their OT & IoT security strategy and implementation.

Christina brings more than 12 years of Industrial Cyber Security experience. She researched security solutions for the automotive industry and lead various European research projects on industrial and critical infrastructure security. She joined SecurityMatters, then startup of 4 people, leading all research activities. Her work shaped the product platform and laid the foundations for long-lasting partnerships in the industry. As Operations Manager she scaled up the organization to deliver realistic and scalable solutions for the growing OT security challenges and supervised worldwide implementations of the flagship OT Monitoring solution.

Christina received her Master of Science (cum laude) in Computer Science from the University of Twente, the Netherlands.
