

BIO: Michael Harttree
Solutions Architect, U.S. Federal

Mike Harttree has been a Cisco Consulting Engineer and Architect at Cisco for the last 22 years. He first supported US Government customers in Cisco Federal for voice, video and data networking, and then three years in the Corporate CTO Office for Collaboration. His areas of focus have included: Network relevance - he holds a patent on Quality of Service, and won a Cisco Pioneer Award for this work; Security – work includes audio security through the U.S. Government's National Telecommunications Security Working Group; Video - where he worked on Tandberg and WebEx integration. Currently, he is the Architect for IoT in US Federal.
